

Worksoft – Connective Automation Platform

Worksoft has been the driving force behind intelligent automation solutions for process discovery, testing, and RPA for over ten years. Our real-world transformation experience, innovating with Fortune 1000 customers, and collaborating with leading global SI and technology partners are at the heart of Worksoft's success.

With Worksoft, enterprises can speed project timelines and ensure data-driven quality for their complex end-to-end business applications, including SAP, Oracle, Salesforce, Workday®, SuccessFactors, ServiceNow, and more.

Worksoft has revolutionized the automation software industry! Our collaborative culture allows our employees to be innovative and to truly make their mark. We are a groundbreaking, cutting edge, have fun, and get rewarded type of environment.

Job Title: .NET Developer (windows/web applications)

We are looking for a Senior Software Engineer who can collaborate in a team setting yet work independently as needed to maintain and extend the capabilities of our flagship product Certify which is the cornerstone of all automation provided by Worksoft. Certify is a hybrid application including desktop components, middle tier of services, SQL Server back end, and some web front ends.

Key Responsibilities:

- In this role, you will be acting as part of a team to develop software solutions using Scrum methodology in 2-week sprints.
- Develop software solutions by conferring with product owners, meeting with customers, understanding system behaviour, and proposing solutions while following the software development lifecycle.
- Design, develop, modify, implement, and support software components anywhere in the software stack.
- Determine root cause for the most complex software issues and develop practical, efficient, and permanent technical solutions.
- Remain current on new technologies and available vendor packages. Evaluate and make recommendations as necessary.
- Assist in task planning, estimation, and scheduling.
- Determine process improvements, best practices, and develop new processes.
- Work in close partnership with cross-functional teams and management.

Skills Required:

- Excellent communication skills both written and verbal
- A desire to solve complex problems with elegant solutions
- The ability to work well with a team of motivated, smart people.
- Solid experience in Microsoft .Net Framework and C# programming
- Excellent understanding of object-oriented design and design patterns
- Proven expertise in full stack web development – knowledge of common web development stacks and JavaScript frameworks
- Experience in desktop application development using WinForms or WPF
- Experience in Blazor, WebView2 is a plus.
- Other skills:
 - Web API
 - SQL Server
 - Entity Framework and object-relational mapping frameworks
 - IOC and dependency injection
 - Asynchronous Programming
 - Unit Testing
 - Git

Experience: 7+ years

Worksoft is committed to creating a diverse and inclusive workplace where our colleagues can be themselves, have equal opportunities, and can perform at their best.

WORKSOFT VALUES

Team No egos here ... just great people, fun, flexibility, and trust.

Respect We welcome, we include, and we respect everyone.

Urgency Have the courage to take risks. Uncover Opportunities and seize the moment.

Success Take ownership, drive innovation, and deliver results.

Truth Honesty, integrity, and ethical behaviour are our truths
