Maheswari Chilakala

Professional Summary:

- **Having 3**+ years of experience in designing and development of applications using **Java and J2EE** technologies, well versed with various development life cycle including specification, documentation and quality assurance.
- Good experience in **Spring Boot & Micro Services.**
- Good experience on **Spring Framework (Spring Core, Spring MVC, Java Bean Validator API, Spring ORM, Spring Data JPA).**
- Good on experience **in RESTful Web Services.**
- Good exposure of **Spring Annotations, Spring Transactions.**
- Experience in ORM framework such as **Hibernate** and **JPA**.
- Good experience to work with distributed technologies **Restful Services** (**JAX-RS API**).
- Good experience on Swagger as a rest API for service endpoints.
- Good knowledge on **YAML**.
- Experienced with IDEs **Eclipse, Spring Source Tool.**
- Experienced in working with Databases like **Oracle** and **MySQL**.
- Good Understanding of **Agile Methodologies.**
- Experience in Application Servers like **Apache Tomcat.**
- Good Experience Tools like **Git, Maven, JUnit.**
- Ability to learn new technologies with minimal time period.

Professional Experience:

- Worked as a Java Developer in **Virtusa Consulting Private Limited** from Dec 2021 to Dec 2022.

- Worked as a Java Developer in Intergrated Digital info services Private Limited from Jan 2020 to Dec 2021.

Key Skills:

- **Operating Environments** : Windows.
- **J2SE Technologies** : Core Java, JBDC.
- **J2EE Technologies** : Servlets, Rest
- **Frameworks** : Spring, Hibernate, Spring Boot
- **Databases** : Oracle10g, MySQL 5.0.
- **Servers** : Apache Tomcat.
- **ORM Tools** : Hibernate.
- **Tool** : LOG4J, Maven, JUnit, JIRA, Git.
- **IDE/Tools** : Eclipse, STS, IntelliJ IDEA, Post Man

PROJECTS INVOLVED

Project: 1

Title	**Lymmi**
Client	John Wiley & Sons, U.S.A
Environment	Spring, Micro Services, Hibernate, SQL&PLSQL, Apache Tomcat.
Role	Java Developer
Duration	Dec-2021 to Dec 2022

Description:

Lymmi is a platform which provides the best solution for the local caterors for delivering the food and can get proper assurable money. And our platform is providing lot of features some of them are in day delivery and customization on food and it is quotation based. By these features it is giving strong competition for all the existing food providers in the market. This platform contains some roles like Provider, Partyer and admin. Chef/Caterer are going to provide the food services for pleasing the partyers at preferred location on event date. This platform will provide the services which will make memorable to the partyer because platform itself taking all the responsibilities including delivering the order to the venue.

Lymmi platform will manage all the types of payments related to providers and partyers .caterer is the module which will provides the functionality to the partyer to raise a request for order on scheduled time at scheduled location and also provides the facility for cancelling the order. The main objective of the platform is to provide the business to the local food providers.

Roles and Responsibilities:
- Developed the controllers using **Spring-Boot MVC**.
- Involved in developing the persistence logic in DAO layer using **Hibernate**.
- Validation model objects using **Java Bean Validation API** and **Spring Validators**.
- Tested the project and offered Project support and bug fixing.
- Took the responsibility for meeting deadlines.

Project: 2

Title	**ARMARIOFIT**
Client	Zalando, USA
Environment	Java, Spring boot, Spring data JPA, Micro Services, MySQL,Tomcat,STS,Git
Role	Java Developer
Duration	Oct -2020 to Nov 2021

Description:
Armariofit is meant for providing the platform for the local merchants to deliver their products, so they can do their business in a larger scale with the competition of existing businesses and can get assured money. In this platform many customers are registered, so customers have lot of delivery services from this platform. Armariofit has multiple actors like Admin, CSR, Merchants, Customers based on the roles the permissions on this platform will be issued.
Administrator manages all information and has access rights to add, delete, edit and view the data related to merchant management. The CSR module manages registration of merchant and merchant stores information. This Delivery services module provides functionality that allow a user to send the delivery request for delivering the products or cancel the orders. Our hope, through this Armariofit system they can easily get the services to deliver the products without step down.

Roles and Responsibilities:
- Involved into the group meetings with managers, team members for status updates, issue tracking and knowledge sharing.
- Developed Web Resources using Rest components.
- Involved in developments of Business and Transaction logic in service layer and persistence logic in DAO layer using **Spring Data JPA**
- Integrated Multiple **Microservcies** using **feign**.
- Worked on **Spring-Boot MVC.**
- Tested Rest API's Using Postman.
- Used **Splunk** for tracing the information.
